

PHARMA & DIETARY SUPPLEMENT SECTOR · 2026 EDITION

# From clinical evidence to formulation — *a single science partner.*

A portfolio of **HPLC content-verified**, clinically validated and patented-technology branded actives for Türkiye's pharma companies and supplement manufacturers. Pharma-grade purity, single-source, exclusive.

## OUR STORY

### A new branch of *four decades of pharma experience.*

Biontera was born at the intersection of more than four decades of Turkish pharmaceutical industry experience and international dietary supplement innovation. We connect clinically validated, patent-driven branded active ingredients with Turkish manufacturers on an exclusive basis.

Our goal: to be the **strategic business partner** of manufacturers in formulation engineering, regulatory processes and supply security. Active ingredients produced with BioSOLVE®, Liposomal, Aquasol™ and Nano-Liposomal technologies — single-source access to international quality.

Stored to **Good Distribution Practice (GDP)** standards in our Ministry of Health approved pharmaceutical warehouse, with smart climate control, cold-chain and end-to-end logging — uninterrupted supply.

## WHY BIONTERA

### 01 Clinical Evidence Driven

Every branded ingredient we offer is supported by peer-reviewed bioavailability or efficacy studies.

### 02 Patented Technologies

BioSOLVE®, Liposomal, Aquasol™ and Nano-Liposomal systems — effective solutions to solubility and absorption.

### 03 GDP Discipline

Pharma-warehouse standard, cold-chain and end-to-end log tracking for raw material security.

### 04 Regulatory Compliance

Actives produced under GMP, FSSAI, US FDA, WHO-GMP and USP standards — with technical files aligned to Turkish regulation.

PRODUCTION CAPACITY

Our offered actives are produced with four advanced technologies designed to overcome the bioavailability limits of traditional forms. Each technology strengthens a different face of the solubility–absorption–stability triangle.

## 01 · PROPRIETARY SYSTEM

### BioSOLVE®

Proprietary formulation technology optimizing solubility and absorption. Foundation of branded curcumin and berberine products. Clinically validated, GMP-compliant, scalable.

**4–9×**

VS. MARKET ABSORPTION

**88%**

CYTOKINE REDUCTION (CLINICAL)

## 02 · LIPOSOMAL SYSTEM

### Liposomal Technology

Stable liposomes confirmed by TEM and phase-contrast imaging; order-of-magnitude higher bioavailability versus traditional forms. Lipid bilayer protects the active through digestion to cell delivery.

**88×**

LIPOSOMAL VIT C — PUBLISHED

**18×**

LIPOSOMAL GLUTATHIONE

## 03 · AQUASOL™

### Aquasol™ Water-Soluble Platform

Proprietary platform achieving over 95% water-solubility for fat-soluble actives. Opens the door for functional beverages, liquid dosage forms and effervescent. High purity (>99.5%), tasteless and odorless.

**95%+**

WATER SOLUBILITY

**2.5×**

CREASSURE™ — VS. MARKET BIOAVAILABILITY

## 04 · NANO-LIPOSOMAL

### Nano-Liposomal Technology

Sub-100 nm particles delivering transdermal permeability and dual water–oil solubility. Ideal for topical nutraceuticals and functional liquids. No cytotoxicity or irritation observed.

**<100 nm**

# Therapeutic Indication Map

— 03 / Quick reference for formulators

A single-glance matrix of all branded and standardized actives in our portfolio by therapeutic area. **For**

**pharma companies:** pharma-grade purity and pharmacopoeia compliance. **For supplement**

**manufacturers:** clinical evidence and formulation-compatible forms.

**01**

## Joint & Anti-inflammatory

BioSOLVE Curcumin® · Liposomal Curcumin · Granular Curcumin · Liposomal Boswellia

**02**

## Metabolic Health & Glycemic

Metaberine® · Liposomal Berberine · Granular Berberine

**03**

## Gastric & Reflux

Gevalin® — Aegle marmelos dual-active

**04**

## Women's Health & Menopause

Grantria® · L-Methylfolate · Saffron Extract (PMS)

**05**

## Cognitive & Focus

Stadice® · Saffron Extract · Liposomal Resveratrol · Nano-Liposomal Saffron

**06**

## Sports Performance & Recovery

Gremin® · CreAssure™ Creatine · Liposomal Vit C · Liposomal Glutathione

**07**

## Digestive & Bowel Health

Consolax® · Probiotic strains (B. clausii, B. coagulans, S. boulardii)

**08**

## Eye Health & Antioxidant

Carotex® β-Carotene · Saffron Extract · Liposomal Astaxanthin · Nano-Liposomal Vit C

**09**

## Prenatal & Folate Support

L-Methylfolate (5-MTHF) · Liposomal Folate · Liposomal Iron

**10**

## Mood & Sleep

Saffron Extract · Liposomal Melatonin · Liposomal Ashwagandha

**11**

## Cardiovascular & Detox

Liposomal Coenzyme Q10 · Liposomal Glutathione · L-Methylfolate · Aquasol™ Q10

**12**

## Skin & Cosmeceutical

Grantria® topical · Nano-Liposomal Vit C · Nano-Liposomal Turmerol™ · Liposomal Resveratrol

▶ **Pharma-grade ↔ Nutra-grade — every active** ships with batch-by-batch CoA, HPLC analytical control, USP/EP/BP/ICH-compliant test profile, and GDP storage discipline.

ANTI-INFLAMMATORY · LIPOSOMAL · CLINICALLY PROVEN

## BioSOLVE Curcumin®

*Liposomal curcumin · 20% curcuminoid · Nutrafoods 2022*

The liposomal form of standardized *Curcuma longa* extract. Delivers **8.9x higher** bioavailability versus conventional curcumin. A published clinical study in osteoarthritis patients showed **88% reduction in pro-inflammatory cytokines** and significant improvement in pain and mobility scores.

TEM and phase-contrast imaging confirm stable liposomes; high-purity flagship of the portfolio. The core active of joint, anti-inflammatory, hepato-protective and general cellular-support formulations.

8.9x

HIGHER ABSORPTION

### HIGHLIGHTS

- 20%+ curcuminoid content · standardized extract
- Stable liposomes confirmed by TEM & phase-contrast
- 8.9x bioavailability vs. market curcumin — published
- Cytokine reduction & clinical improvement in OA — published
- 25%+ water-soluble liposomal curcumin form also available

*Biontera · Branded Active Ingredients Portfolio 2026*

METABOLIC HEALTH · BIOSOLVE® BERBERINE

## Metaberine®

*Bio-optimized berberine · BioSOLVE® patented technology*

A registered formulation that overcomes berberine's **poor solubility and absorption** via BioSOLVE® patented technology. Delivers approximately **4x higher absorption** versus standard market berberine — a strong active for glycemic balance, lipid profile and metabolic syndrome management.

Next-generation core active for type 2 diabetes pre-stage, dyslipidemia, polycystic ovary syndrome (PCOS) and metabolic syndrome formulations. Combines the natural efficacy of berberine with a modern bioavailability platform.

~4x

VS. MARKET ABSORPTION

### HIGHLIGHTS

- Registered formulation built on BioSOLVE® patented absorption platform
- ~4x bioavailability vs. market berberine forms
- Glycemic control, insulin resistance and metabolic syndrome
- Lipid profile (LDL, total cholesterol) improvement
- Suitable for PCOS and hormonal balance formulations

GASTRIC HEALTH · GERD · REFLUX · DUAL MECHANISM

## Gevalin®

*Aegle marmelos (Bael) extract · Standardized*

A **dual-action natural ingredient** for GERD, hyperacidity and functional dyspepsia. Mechanism combines stomach acid buffering with increased mucus secretion, forming a protective mucosal barrier — a natural alternative to pharmaceutical antacids.

Sourced from 100% botanical material with no synthetic components. Suitable for sensitive patient populations and safe for long-term use. Ideal for anti-reflux gummies, liquid suspensions and chewable tablet formulations.

# 2-in-1

ANTACID + MUCOSAL PROTECTIVE

### HIGHLIGHTS

- Dual action: acid buffering + mucosal barrier strengthening
- 100% botanical source — synthetic antacid alternative
- Standardized extract — batch-consistent efficacy
- GERD, functional dyspepsia, chronic gastritis support
- Suitable for gummy, suspension and chewable tablet formats

## Grantria®

*Triple-active pomegranate (Punica granatum) extract*

A registered triple-active composition combining **punicalagin, ellagitannins and anthocyanins** for synergistic effect. Supported by a two-armed clinical evidence chain for menopausal symptom management and skin vitality — systemic and topical effects evaluated together.

Indispensable for hormonal support, antioxidant, anti-aging and cosmeceutical formulations. Ideal for women's health gummies, capsules and topical serum/cream products.

# 3

SYNERGISTIC PHYTOCHEMICALS

### HIGHLIGHTS

- ◉ Triple-active composition: punicalagin + ellagitannin + anthocyanin
- ◉ Systemic (menopause) + topical (skin) two-armed clinical evidence
- ◉ Hormonal support + antioxidant + anti-aging in one product
- ◉ Capsule, gummy, liquid suspension and cosmetic formats
- ◉ Menopause, PMS and skin-aging formulations

REGISTERED COMPOSITION

COGNITIVE HEALTH · FOCUS · REACTION TIME

## Stadice®

*Mangifera indica (mango seed) extract · Mangiferin-based*

A mangiferin-based, **clinically validated** cognitive support active. Supports attention span, memory and reaction speed. Optimized for esports, academic performance and age-related cognitive support formulations.

One of the few cognitive actives with a published clinical manuscript. Neuro-safety profile maintained even at high doses; suitable for positioning in the nootropic category.

*RT* ↓

IMPROVED REACTION TIME

### HIGHLIGHTS

- Standardized mangiferin — the fundamental phytochemical for cognition
- Clinical improvement in reaction time and attention scores
- Published clinical manuscript support
- Esports, academic and anti-aging cognitive products
- Tablet, capsule, functional drink and gummy formats

SPORTS PERFORMANCE · MUSCLE RECOVERY · ENDURANCE

## Gremin®

Registered dual-polyphenolic complex

A **polyphenol combination** with efficacy demonstrated in two independent clinical publications. Reduces post-exercise muscle damage markers, improves endurance and recovery time. Easy integration into pre/intra/post-workout formulations.

One of the rare sports-category actives supported by "two clinical publications" level evidence. Compatible with creatine, BCAA and electrolytes — ideal for synergistic support formulations.

# 2

PUBLISHED CLINICAL STUDIES

### HIGHLIGHTS

- Efficacy proven in two independent clinical publications
- Reduces post-exercise muscle damage markers
- Improvement in endurance + recovery time
- Anti-inflammatory support via polyphenolic composition
- Suitable for sports capsules, drinks and sachets

REGISTERED POLYPHENOL COMPLEX

BOWEL MOTILITY · NATURAL LAXATIVE · PUBLISHED

## Consolax®

Natural laxative botanical complex · IJTCM 2022

A **non-irritating, physiological** natural alternative for constipation management. Suitable for sensitive patient populations (elderly, pregnant, chronic use) and for "non-stimulant laxative" positioning. Supported by IJTCM (2022) publication.

A gradual, physiological effect profile independent of the long-term mucosal risks of senna-derived stimulant laxatives. Suitable for daily support and continuous use.

# IJTCM

CLINICAL STUDY · 2022

### HIGHLIGHTS

- Non-irritating, physiological effect profile
- Suitable for sensitive patient groups (elderly, pregnant, chronic use)
- IJTCM (2022) clinical publication reference
- Stimulant laxative alternative — long-term safety
- Suitable for tablet, sachet, liquid suspension formats

ANTIOXIDANT · PROVITAMIN A · PUBLISHED

## Carotex®

*Stabilized beta-carotene · IJRPS publication*

A **beta-carotene source** distinguished by its high bioavailability and stability. As a non-toxic provitamin A form, it is the core active for eye, skin and general antioxidant formulations. Backed by an IJRPS publication academic evidence chain.

Preferred in formulations seeking a vitamin A source without retinol-toxicity risk; offers a wide usage profile including pregnant and pediatric populations.

# $\beta$ -Carotene

STABILIZED · PROVITAMIN A

### HIGHLIGHTS

- High-bioavailability, stabilized beta-carotene
- Non-toxic provitamin A — safe vitamin A source
- IJRPS peer-reviewed publication reference
- Eye health, skin radiance, antioxidant formulations
- Broad safety profile for pregnant and pediatric populations

## Saffron Extract

*Crocus sativus L. (stigma) · 1.5:1 extract ratio · Safranal & Crocin standardized*

From millennia-old traditional use to modern clinical research, saffron (*Crocus sativus L.*) is one of the rare botanical actives tested in **placebo-controlled RCTs** across depression, anxiety, premenstrual syndrome, eye health, sleep and cognitive support. The extract is dual-standardized by **HPLC for Safranal  $\geq 0.5\%$  and Crocin  $\geq 2.0\%$**  to ensure batch-to-batch consistency of clinical efficacy.

Manufactured to USP-test-profile purity: heavy metals (Pb, As, Cd, Hg), mycotoxins, pesticide residues, microbiological load, residual solvents and PAH testing applied per batch. **Non-irradiated, ETO-free**; from an **FSSC 22000 v.6, FSSAI, ISO 22000:2018, ISO 9001:2015, GMP, HALAL and KOSHER** certified production infrastructure.

# 28–30 mg

CLINICAL RESEARCH DOSE / DAY

### HIGHLIGHTS

- HPLC dual content verification: **Safranal  $\geq 0.5\%$  · Crocin  $\geq 2.0\%$**
- Standard clinical research dose: **28–30 mg/day**
- USP test profile: heavy metals, mycotoxins, PAH, full microbiological
- 1.5:1 extract ratio · ethanol + water extraction
- Yellow-to-orange powder · water-soluble · #40 mesh  $\geq 95\%$  pass-through
- FSSC 22000 + FSSAI + ISO 22000 + GMP + HALAL + KOSHER certified
- Capsule · tablet · gummies · functional drink · liquid suspension formats

ACTIVE FOLATE · USP 2025 · MTHFR BYPASS

## L-Methylfolate *(5-MTHF)*

*Calcium L-5-Methyltetrahydrofolate · The active biological form of folate*

Folic acid (the synthetic form of vitamin B9) must first be converted by the **MTHFR enzyme** into methylfolate before it can enter the cells. Approximately **40–60% of the global population** carries a genetic polymorphism that reduces this enzyme's efficiency; for these individuals, standard folic acid supplementation falls short.

**L-Methylfolate** is delivered in the form that has already completed the conversion step — bypassing the MTHFR enzyme entirely and providing direct biological activity regardless of genotype. USP 2025 monograph compliant production, 95–102% purity range.

# USP

2025 MONOGRAPH COMPLIANT

### HIGHLIGHTS

- Fully USP 2025 monograph compliant production
- Effective regardless of MTHFR genotype — for the entire population
- Reaches the bloodstream directly — no enzymatic conversion needed
- Prenatal: gold standard for neural tube defect prevention
- Women's health, cardiovascular, neurological formulations

Stable liposomes verified by TEM and phase-contrast imaging. Order-of-magnitude higher bioavailability versus traditional forms; most with published bioavailability studies. Compatible with tablet, capsule, gummy, liquid suspension, sachet and functional drink formats.

## LIPOSOMAL VITAMINS

PRODUCT	SPECIFICATION	BIOAVAILABILITY
Liposomal Vitamin C	20–70% range — pediatric clinical (URTI)	<b>88× vs. market</b>
Liposomal Vitamin D <sub>3</sub>	Stable liposomes — TEM verified	<b>5.1× vs. market</b>
Liposomal Glutathione	Cellular detox · antioxidant	<b>18× vs. market</b>
Liposomal Coenzyme Q10	Cardiovascular · energy metabolism	<b>4.3× vs. market</b>
Liposomal Melatonin	Sleep regulation · circadian rhythm	<b>5× vs. market</b>
Liposomal Ferric Pyrophosphate	Iron support — no stomach upset	<b>3.6× vs. market</b>

## LIPOSOMAL BOTANICALS

PRODUCT	SPECIFICATION	BIOAVAILABILITY
Liposomal Berberine HCl	Metabolic syndrome · glycemic balance	<b>4× vs. market</b>
Liposomal Ashwagandha	Stress · sleep quality · adaptogen	<b>3.5× withanolides</b>
Liposomal Resveratrol	Antioxidant · anti-aging · cardiovascular	<b>4.2× vs. market</b>
Liposomal Curcumin 25% Water-Soluble	First-time 25%+ water-soluble liposomal curcumin	<b>Water-soluble</b>

## EXTENDED LIPOSOMAL RANGE

**Vitamins:** Vit A, B1, B2, B6, B7 (Biotin), B9 (Folate), B12, E, K2, K2-7 + D3 · **Minerals:** Ferrous Fumarate, Ferrous Bisglycinate, Magnesium Oxide, Magnesium Sulphate, Magnesium Bisglycinate, Zinc Sulphate, Zinc Oxide · **Others:** NAD/NMN, DHA, Colchicine, Astaxanthin, Amla, Bacopa, Garlic, Rosemary extract, Piperine, Arginine, BCAA, Methionine, Glutamine

Aquasol™ is the proprietary platform delivering over 95% water-solubility for fat-soluble actives. Opens the door for functional drinks, effervescent and liquid dosage forms. **Nano-Liposomal** technology delivers sub-100 nm particles with transdermal permeability and dual-phase solubility.

## AQUASOL™ WATER-SOLUBLE ACTIVES

PRODUCT	SPECIFICATION	ADVANTAGE
CreAssure™ Creatine Monohydrate	Tasteless, odorless · >99.5% pure · >95% water-soluble	<b>2.5× bioavailability</b>
Creatine Hydrochloride	>99.5% purity · clinical reference	<b>High solubility</b>
Coenzyme Q10 (USP — Pharma Grade)	>99% purity · 2Z isomer & Q9 <0.5%	<b>Pharma grade</b>
Coenzyme Q10 (Water-Dispersible)	10–80% concentration range · water + oil compatible	<b>&gt;80% soluble</b>

## NANO-LIPOSOMAL ACTIVES (<100 NM)

PRODUCT	SPECIFICATION	HIGHLIGHT
Nano-Liposomal Vitamin C	NLT 15% · 24h transdermal 95.9% · no cytotoxicity	<b>Topical</b>
Nano-Liposomal Saffron	NLT 1.6% crocetin · most stable, bioavailable saffron	<b>Crocetin 1.6%+</b>
Nano-Liposomal Resveratrol	Stable liquid · water + oil dual-soluble	<b>Dual-phase</b>
Nano-Liposomal Ashwagandha	Adaptogen · transdermal option	<b>Topical</b>
Nano-Liposomal Turmerol™	Nano-form curcumin · cosmeceutical	<b>Cosmeceutical</b>
Nano-Liposomal Silymarin	Liver support · bioavailability-enhanced	<b>Hepato</b>

## GRANULAR FORMS

**Granular Curcumin** — >90% curcuminoids (w/w), 95% pass through #20 mesh. · **Granular Berberine** — >82% berberine HCl (w/w), 95% pass through #20 mesh. Improved flow properties for direct tablet and capsule manufacturing.

# Registered Probiotic Strains

— 16 / Clinically Dossiered Strains

Registered probiotic strains with clinical dossiers for pediatric, women's, renal and cognitive formulations. Each strain has its own clinical manuscript; GRAS & FSSAI approved, used in 30+ products with food and drug licenses.

STRAIN	BRAND	INDICATION
<b>Bacillus clausii UBBC-07</b>	Bacipro	Acute/chronic diarrhea · post-antibiotic balance · immunity
<b>Bacillus coagulans Unique IS2</b>	UBLAC	IBS · bloating · general intestinal balance
<b>Lactobacillus rhamnosus UBLR-58</b>	GG LAC	Pediatric diarrhea · allergy · immune modulation
<b>Saccharomyces boulardii Unique-28</b>	Florafix	Antibiotic-associated diarrhea · traveler's diarrhea · Clostridium balance
<b>Lactobacillus reuteri</b>	RuTeri	Infant colic · oral health · GI discomfort
<b>Bifidobacterium lactis BB-12 type</b>	Bifido-Plus	Constipation · colon health · immune support

## CLINICAL INDICATIONS — QUICK ACCESS

### PEDIATRIC

Colic · pediatric diarrhea · immunity · allergy modulation

### WOMEN'S HEALTH

Vaginal microbiome balance · UTI prophylaxis

### RENAL & COGNITIVE

Urea-lowering · gut-brain axis · behavioral support

### GENERAL INTESTINAL

IBS · constipation · traveler's diarrhea · antibiotic balance

## GDP DISCIPLINE

### Ministry of Health approved *pharmaceutical warehouse*.

Our central facility at Başkent OSB operates to Good Distribution Practice (GDP) standards. Smart climate control, +2/+8°C cold-chain and end-to-end log tracking — raw material security.

- ✓ Ministry of Health approved pharmaceutical warehouse
- ✓ +2 / +8 °C cold-chain storage
- ✓ Smart climate control and temperature logging
- ✓ Türkiye's geographic center: 24-48h shipping nationwide

## PRODUCTION STANDARDS

### International *quality chain*.

The actives we offer come from suppliers manufacturing under international accreditation and pharmacopeia standards. Each product is supported by a technical file, CoA and, where required, DMF/CEP documentation.

- ✓ cGMP · FDA · WHO-GMP production standards
- ✓ USP · EP · BP · IP pharmacopeia compliance
- ✓ FSSAI, HACCP, Halal, Kosher certifications
- ✓ ICH stability testing · ISO management standards

## QUALITY FRAMEWORK

### Single-source access in Türkiye, *international quality*.

Every active we offer is delivered with its technical file and clinical evidence chain, in compliance with Turkish regulation. Supplier audits, batch-by-batch CoA verification and Turkish dietary supplement regulation alignment are part of our service.
